Re Item V

**Reasoned statement with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement**

Reference is made to the following document/s/:

D1: US-B-6 142 388 (ENVIROCARE INT INC) 2000-11-07

The document D1 is regarded as being the closest prior art to the subject-matter of claims 1 and 11, and shows (the references in parentheses applying to this document):

A nozzle for atomising a liquid by means of a gas, comprising a mixing chamber (20, 88) extending between an upstream end (110) and a downstream end, at least one liquid inlet (discharge plane 80) and at least one tangential gas inlet (105) to said mixing chamber (20), and an outlet positioned at the downstream end of said mixing chamber (20, 88), whereby a centre body (125) having a generally converging configuration, seen in the flow direction, is provided in the mixing chamber (20, 88).

The subject-matter of claim 1 differs from this known nozzle in that:

-at least one liquid inlet (6c) is positioned at or near the upstream end (3a) of said mixing chamber (1) and in the upstream direction with respect to said at least one gas inlet (5).

The subject-matter of claim 1 is therefore new (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as producing droplets of narrow size distribution with a reduced gas consumption in an internal mixing nozzle.

The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

By providing the liquid inlet (6c) at or near the upstream end (3a) of said mixing chamber (1) and in the upstream direction with respect to said at least one gas inlet (5) a better mixing/atomisation can take place.

Document D1 teaches on the contrary that the liquid outlet should be positioned downstream of the gas inlet in order to prevent the gas to deflect the course of the liquid.

Method claim 11 refers to the use of a nozzle according to claim 1 and therefore also meets the requirements of the PCT with respect to novelty and inventive step.

Claims 2-10 and 12 are dependent on claim 1 respectively claim 11 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
